

Terapad.com are offering to design and host user-friendly websites for the Scout Association both here in the UK and in the USA.

They have already designed websites for the Salvation Army and UK cyclists organisation.

They are offering a full design service, hosting and supply of a Content Management System (CMS) that will allow any leader to add their own photos and articles within their section to keep the sites up to date and looking fresh. There will be a full Admin panel for a site manager to control access and content.

Terapad will provide templates for all levels of the organisation to meet the differing requirements of the Scout Association.

What's in it for them? – simply that they want to get their name known so will be using us as a marketing tool – not a bad trade-off.

Below is some design work that has been provided by their design team, – see what you think.
